

COVID is here to stay. Despite being fully vaccinated and boosted, one may still get COVID. Our recommendations remain that you, your family and crew are fully vaccinated (2 doses of the Pfizer or Moderna vaccines followed by boosters) and be prepared to wear masks if necessary.

Porsche Club Racing will follow current CDC recommendations for racing events as well as respect each race locations' protocols to keep all safe and minimize the spread of infections.

CDC SITE- <https://www.cdc.gov/coronavirus/2019-ncov/index.html>

Be aware that each state, county, city, and race track may also have their own requirements, which may not be the most current regardless of CDC recommendations. Therefore, bringing masks, sanitization equipment, and proof of vaccination if vaccinated, to each race venue is recommended. Please follow any individual track requirements at the time of the event.

Be respectful of those who may not be vaccinated and are at risk for COVID infection in all personal interactions.

Participation is at your own risk: Attendees with higher risk factors for COVID-19 infection must evaluate their own risk regarding participation at any race event. If an attendee develops a fever, cough, sore throat, loss of smell or taste or other symptoms of possible COVID-19 infection, before, en-route to, or at the event, the attendee should refrain from coming/participating at a race event and seek medical attention. If you are exposed, there is also a risk of spreading COVID-19 to your friends/family/co-workers when you return home.

See the CDC recommendations for exposure and testing here-
<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

Important: As of this current 10/20/23 COVID revision, few if any restrictions regarding COVID are in place. However please check with your country, province, state, county regarding reentry and quarantine and testing recommendations prior to leaving for the race event as they may change. Be aware of TSA, airlines and common carrier rules and restrictions when traveling.

Race safe and hard!!
